"HOMES NOT HOUSES"

California Bungalow Homes

THIRD EDITION OF BUNGALOWCRAFT — PIFTEENTH THOUSAND

A book on Bungalow and Cottage building in its latest development. Illustrated with half-tone and line engravings of the charming Bungalows of Los Angeles, Pasadena and adjacent towns which for artistic beauty and coziness are justly famed the world over.

AN EFFICIENT AID TO BEAUTIFUL AND CONVENIENT HOME BUILDING

Arranged and edited by Henry Menken

ONE DOLLAR PER COPY, CARRIAGE PAID TO ANY ADDRESS

We have made a long careful study of the Bungalow and take much pride in the credit given us for our part in bringing them to their present state of perfection in outside attractiveness and artistic beauty and inside cozy convenience. The Bungalow is adapted to any climate and can be built just as warm and comfortable as any other style of house and at no greater cost. But it is a mistake and a certain cause for disappointment to attempt, as many do, to build Bungalows from the pictures in the book, and without our plans. The intent of this book is only to give a general idea of the houses and arrangements. The complete plans are inexpensive and without a plan with its exact measurements and carefully studied details it is impossible to get the artistic beauty and cozy convenience for which our Bungalows are noted all over the world. In fact a good plan is the best and most economical investment a home builder can make. It eliminates all possibility of "extra charges," which is the great bugbear of building. The contractor knows exactly what he must furnish in labor, materials and workmanship, and the owner knows exactly what he may expect to receive and just what he must pay. The estimates given in this book represent the cost of the necessary labor and materials in California. In colder climates these costs will be increased from 10 to 25 per cent. See next page for description of plans, etc.

LIBRARY
PUBLIC

> "Our contractors say that your plans are as fine and complete as any $100.00 plans they ever saw."
> E. A. Hathaway, Central Point, Ore.

BUNGALOWCRAFT PLANS

OUR PLANS show four elevations (front, rear and both sides), foundation and floor plans all drawn to the scale of one-fourth inch to the foot. They are complete working drawings showing the size and exact location of every closet, pantry, bookcase, seat, buffet, mantel, door and window; piping for fuel and lighting gas; wiring, outlets and switches for electric lights, etc. A roof plan is given where any intricacy of construction seems to demand it. Interior details of closets, cupboards, buffets, mantels, seats, stairs, beams, wainscoting, woodwork, etc., are drawn to large scale with sections. The specifications are as complete as possible and cover every step from excavation to painting and finishing. The plans are made by practical men, and any builder can follow them without difficulty; still, if a question arises, we shall esteem it a privilege to be allowed to reply to any inquiry or to explain any puzzling matter. We wish every house built from our plans to prove a good advertisement for us. Our large business has been built up by recommendations from pleased clients.

STOCK PLANS—For the price quoted in this book with each plan we send a complete set of working drawings and specifications as shown in the book or reversed. Every detail is covered and the kind and quality of every material is clearly stated.

The prices quoted in the book for stock plans cover only one set of plans and one set of specifications. Duplicate sets cost $2.50. All of our plans and specifications are adapted to the climate and the building material of the location in which the Bungalow is to be built. We send plans to every part of the United States, Canada, Cuba, Mexico, Hawaii, etc. In reply to many inquiries we would state that almost invariably the ceilings are 9 feet high on first floor and 8½ feet high on second floor.

SPECIAL PLANS TO ORDER—If you do not find a house in the book which exactly meets your requirements, let us make special plans for you. Make a rough sketch of what you want, showing the number of rooms on each floor, their size and approximate arrangement. Write a list of all details that are important and send to us together with a remittance or deposit amounting to at least one-third of the total cost of the plans. You can estimate the cost of the plans at the rate of $5.00 per room, not counting Hall, Bathroom or Cellar as rooms. We will then make exact pencil drawings to scale (¼ in. to 1 ft.) of floor plans and one or two elevations and submit for your criticism. These pencil drawings can be altered until they exactly meet your wishes when we will finish up with all necessary details and send you three sets of blue prints and three sets of specifications. Sometimes all you will need will be an altered floor plan for one of the houses illustrated in this book in which case (provided the exterior need not be altered) the extra cost will be $5.00.

ABOUT ORDERING AND REMITTING—If you have a copy of this book, you may deduct one dollar from the printed price when ordering either stock plans or special plans. Please order stock plans by number, giving your postoffice and express office distinctly written. When possible, we much prefer to send plans by express prepaid rather than by mail. Make checks, etc., payable to

It frequently is desirable to build a good deal of home for very little money and the illustration shows one way —and a very good way—to do it Built in "California Style" with battened boards and burlap it can be put up complete for about $720.00; if finished in lath and plaster it will cost about $1000.00. While originally built for a village home, it is admirably suitable for a ranch-house. The arrangement and sizes of rooms should be noted. Complete working plans and specifications, either as shown or reversed, $9.00.

A clever arrangement of five rooms and a bungalow which has proved to be attractive and satisfactory. One chimney carries both the fire-place flue and the kitchen flue. This house has been built for less than $800.00 fully plastered and well finished. Its size is 26 ft. by 30 ft. It has a convenient cabinet kitchen, a buttressed opening between the living and dining rooms and is light and airy throughout.

Complete working plans and specifications either as here shown or reversed, with all necessary details, $8.00.

This little home was planned by a lady "who does her own work." The kitchen is the very heart of the house. Just a step or two takes one to any room and the floor plan should be carefully studied. The dining room with one side almost all window is an unusually cheerful room.

This house cost less than $1000.00 complete with plumbing, electric lighting, etc.

Complete plans and specifications either as here shown or reversed, with all necessary details, $9.00.

Rear bedroom may connect with bathroom if desired. Note open fireplace in living room and buffet in dining room.

A very cozy little nest, just right " for her and me and the baby." The size is about 24 ft. by 30 ft. and its cost including plumbing, electric lighting, etc., was about $800.00. It could be built cheaper in some localities. The lighting and ventilating are excellent.

Complete plans and specifications with all necessary details either as shown here or reversed, $8.00.

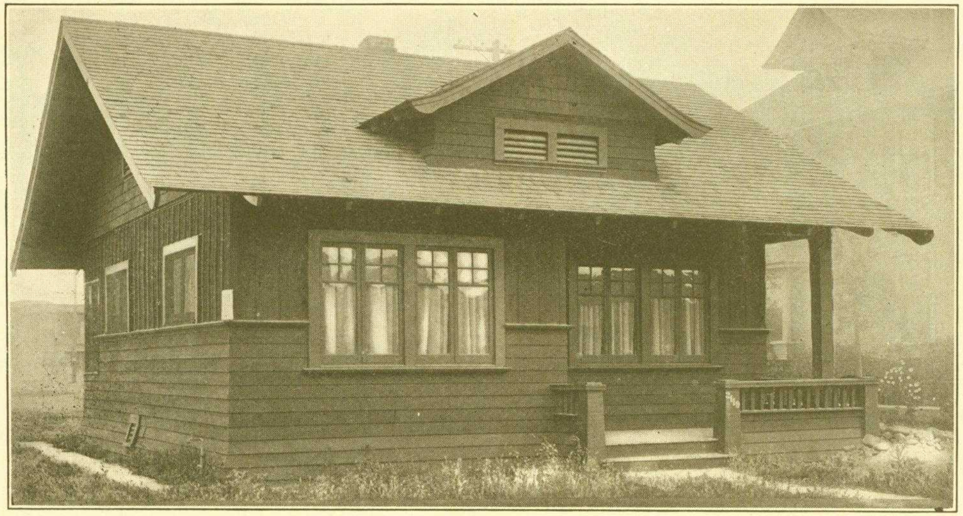
Floor Plan No. 5A
With three rooms.

An inexpensive, snug little California house. Canvas or burlap is used instead of plaster and the house can be built for about $500.00. Living room is wainscoted 5 ft. 6 in. high. Number 5A is not as large on the ground and has only three rooms, but presents about the same exterior. Cost about $350.00. Plans and specifications for No. 5, either as shown or reversed, $7.00; for No. 5A, $5.00. Both plans have cabinet kitchens and No. 5 has a built-in buffet.

We have these plans for both "boards and burlap" and "lath and plaster" when ordering plans state which is wanted. The beam structure shown in front of porch does not belong to the original plan.

NUMBER 9



This house is shown built in California style without plastered walls. It is finished in burlap inside with high wainscot in living and dining rooms. Size about 28 ft. by 28 ft., and will cost about $700.00. Built with foundation and plastered walls it should cost about $900.00. Porch may be made wider if desired. Complete plans and specifications either as shown or reversed, $8.00. Note variation in floor plan 9A.

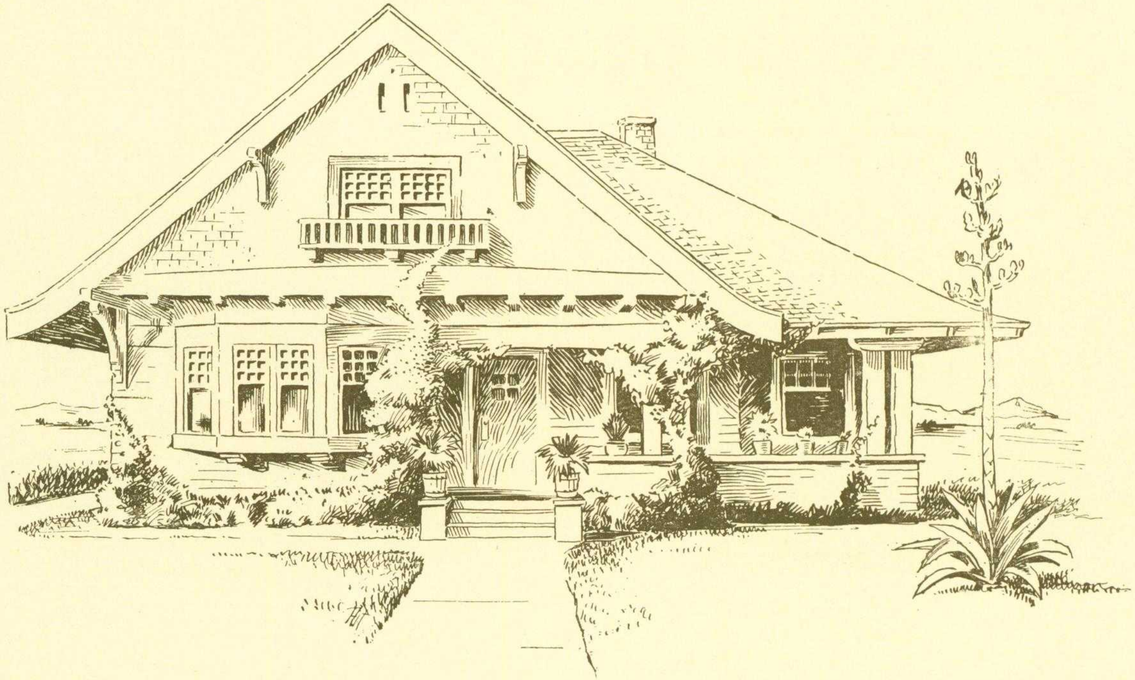
Size 34 ft. by about 64 ft.

One of our handsomest Bungalows recently built at a cost of $3500.00, with cellar and furnace. There are seven well arranged, good sized rooms, and space for two good rooms on second floor if required Construction is of wood with artificial stone porch work and brick chimneys. Complete working plans and specifications with all interior and exterior details, either as shown or reversed, $10.00.

NUMBER 40A



One of the most popular houses we have ever designed and one that is susceptible to many arrangements of rooms, either with one floor or two, according to the amount of room required. It is about 38 feet front and with one floor and attic used for storage will cost about $2300.00; with two floors finished as shown on next page it will cost about $2600.00. If second floor is not needed for bed rooms a fine billiard room or smoking room could be made there. Complete plans and specifications either as here shown or reversed, $10.C0. See floor plans on next page.

Floor Plan No. 46
Size 30x57; cost about $2100.00

A solid substantial looking bungalow and one of the most popular of our designs. This house has been built more than one hundred times and in nearly every State of the Union. The broad sweep of the front porch, unbroken by columns, is a much appreciated feature. We give several floor plans on this and the next page as the building lends itself to many varying arrangements. Complete plans and specifications either as here shown or reversed, $10.00.

Two large rooms may be made on second floor, in which case we put windows in the gables. Our house No. 124 on Page 40 much resembles this.

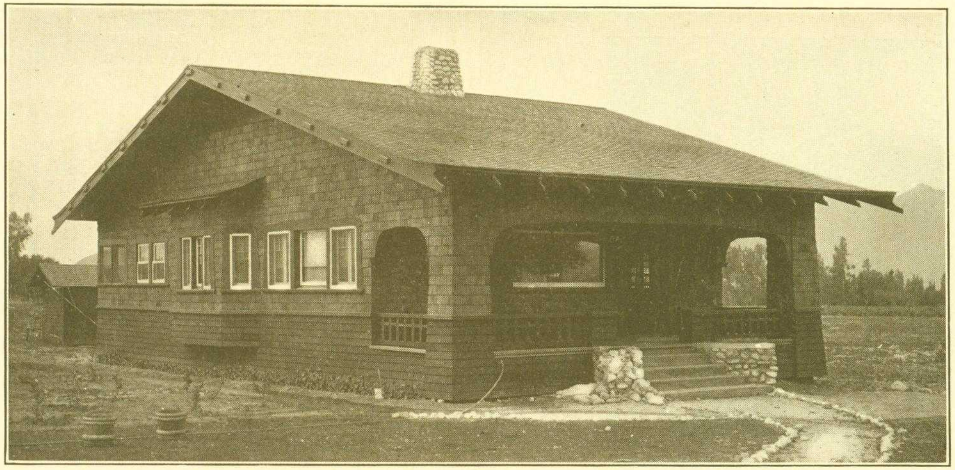
A very clever arrangement of 8 good-sized rooms on one floor. The second floor may be used for storage or there is space for 3 good rooms with closets. The reception hall with its nook and seats is a very taking feature. The house is 38 ft. front by 66 ft. deep and has been built for $2750.00. An ideal bungalow for a large family. Complete plans and specifications either as shown here or reversed, $10.00.

Front is much like No. 46 on Page 22.

Floor Plan No. 52

NUMBER 54



A most attractive little home which has been built many times. Its five rooms are very conveniently arranged. Living and dining rooms have narrow pine finished floors, paneled wainscot and beamed ceilings. Complete plans and specifications, either as here shown or reversed, $10.00.

Porch may be made 7 ft. or 8 ft. wide if desired.

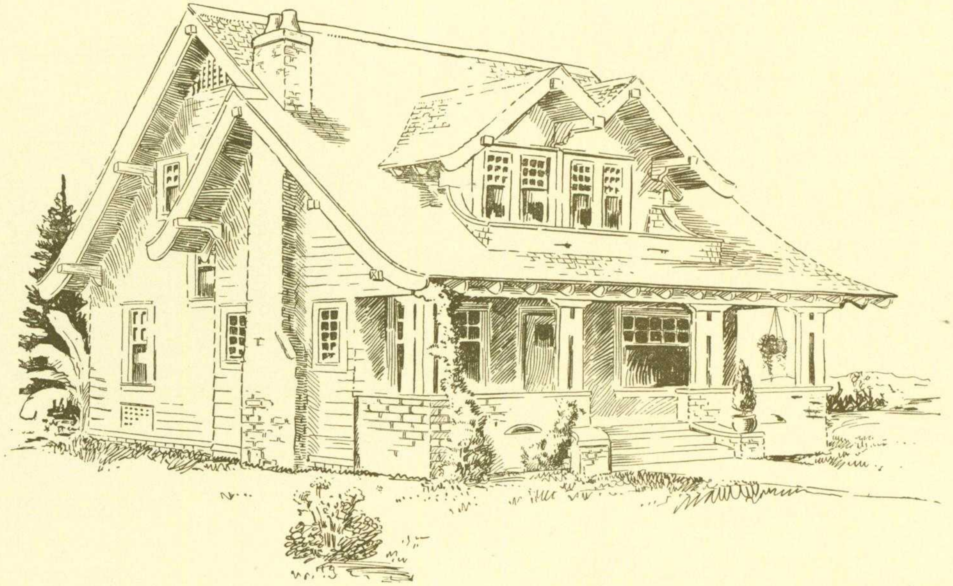
NUMBER 62

See Floor Plans Next Page



A design which is susceptible to many interior arrangements and has always proved a most economical house to build. We have many floor arrangements for this exterior and on the next page show a plan which is a general favorite. Size 34x46 and cost about $2600.00. Ceilings 9 feet on first floor; 8½ feet on second floor. Complete plans and specifications either as here shown or reversed, $10.00.

House No. 506 is very similar in exterior.

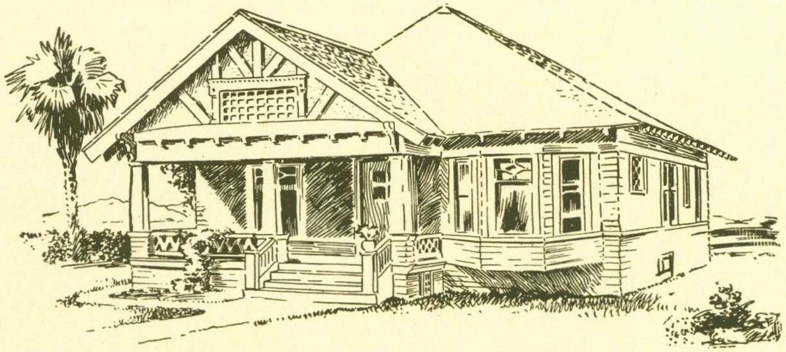
NUMBER 66



A design that is always popular as it has a taking exterior and can be made to accommodate almost all requirements as any number of rooms may be "hitched on behind" without marring its beauty. We have it in stock plans with four, five and six rooms as shown on this and the next page. Complete plans and specifications as here shown or reversed, $10.00. A more convenient little home would be hard to plan. Front gable is of cement stucco with "half-timbering."

THE BUNGALOWCRAFT CO.
LOS ANGELES, CAL.
PLAN N 714

This is one of the many "flat roofed" Bungalows we have designed recently. The roof is pitched too flat for shingles, but the sheet roofings are very satisfactory, and much more water-proof than shingles. The room arangement could not well be improved. Complete working plans and specifications with all exterior and interior details, either as shown or reversed, $10.00.

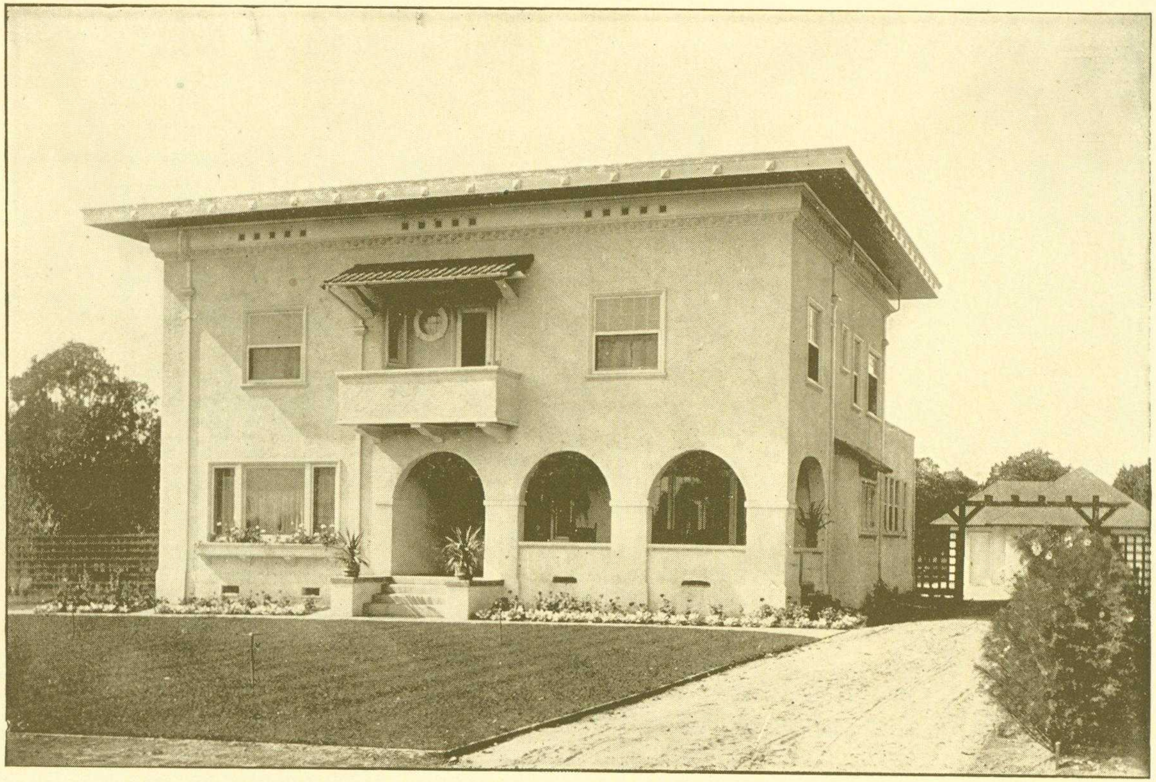
Size 28 ft. by 52 ft. Cost about $1700.00
Floor Plan No. 710



For any climate, but especially adapted to the hot zone, a stucco house has many advantages over any other construction if properly built. It is dry and cool in summer, dry and warm in winter and always healthful and sanitary. This house is built up of rough stuff covered with wood or metal lath and two coats of cement stucco outside. If good Portland cement of proper strength be used, it will stand any weather without cracking and positively improve with age. See floor plans on next page.

Complete plans and specifications either as shown here or reversed, $10.00.

NUMBER 623

This is a good example of the low-pitched chalet Bungalows which are becoming so popular. The effect is artistic and inviting, and as the roofs are not of shingles but of prepared roofing, they are perfectly safe and water-tight in any climate. The rafters and braced from bearing partitions so that they will carry any amount of snow. The breakfast room is a taking feature as it may be all opened up if desired, having screens and sashes so arranged. Complete working plans and specifications with all interior and exterior details, either as shown or reversed, $10.00.

FLOOR PLAN

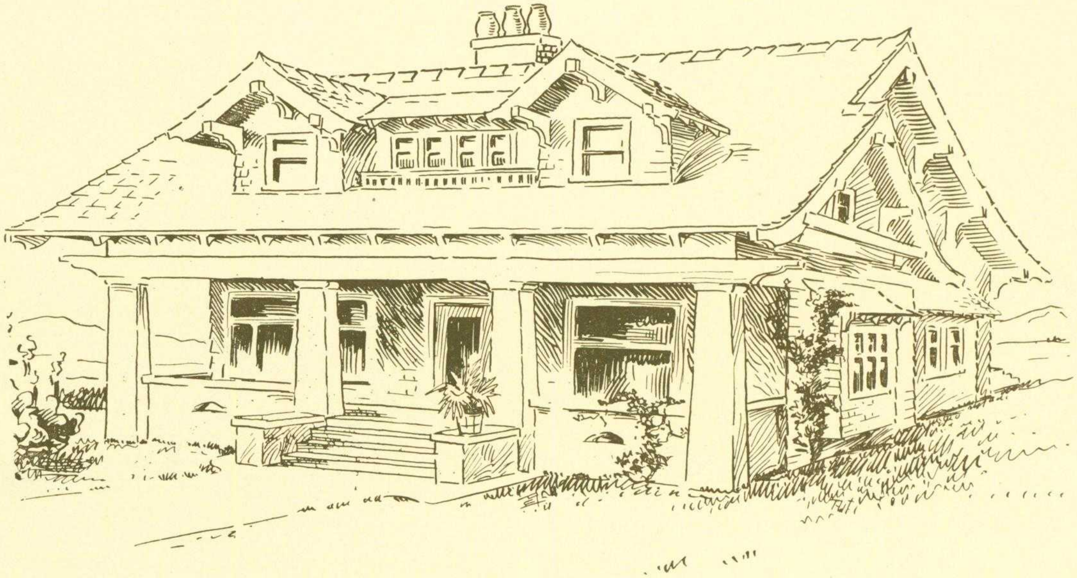
No. 200

This illustration shows a pretty and convenient bungalow that has been erected from our plans for $1400.00. The chimney and front porch walls are of blue hard burnt brick and the porch floor is of cement.

The living room has a pressed brick mantel, book-cases and cove ceiling. The dining room has a pretty buffet, beamed ceiling, battened wainscoting with plate rail. The kitchen is fitted up with cupboards, bins, drawers, bread-board, etc., in full cabinet style. The floor covers a space of 26x44 feet.

Complete working plans and specifications either as here shown or reversed, $9.00.

NUMBER 229



"The house with ten closets"

For a large house this is not an expensive one. It is built on true Bungalow lines and yet its second story rooms have full height ceilings. (First floor 9 ft.; second floor 8½ gt.) It has hardwood floors, beam ceilings and paneled wainscot in living and dining rooms. The arrangement is fine as will be seen from the floor plans on the next page. The house is 36x50 feet over all and will cost about $4000.00.

Complete working plans and specifications either as here shown or reversed, $10.00.

Illustration does not do justice to this handsome house as it is much higher than the picture indicates.

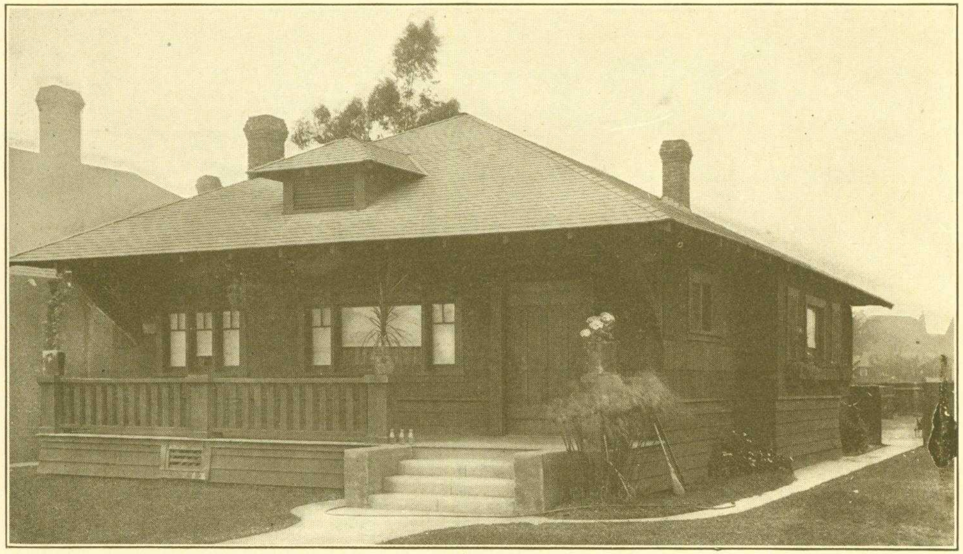
SECOND FLOOR PLAN

Good big rooms, full square ceilings and ten closets exclusive of kitchen.

NUMBER 238



This cozy little home (24x48) has been built from our plans for $1300.00, with finished narrow pine floors in living room and den, fully plastered inside and best of plumbing, electric fixtures, painting, staining, etc. One of its many attractive features is the projection of the main roof over the front porch supported by large brackets instead of columns.

Complete plans and specifications, either as shown or reversed, $10.00.

See other floor plans for this house on next page.

We sold this plan forty times in 1910 and can fairly call it "our best seller."

SECOND FLOOR PLAN

One of our most attractive houses with large rooms and plenty of closets. Splendidly lighted and ventilated. Exterior is of wood with brick porch-work and chimneys, and front gables in Old English plaster and half-timbering.

Size about 30x46, and cost about $3500.00 with cellar.

Couldn't be much better arranged.

Complete working plans and specifications with all interior and exterior details, either as shown or reversed, $10.00

FIRST FLOOR PLAN

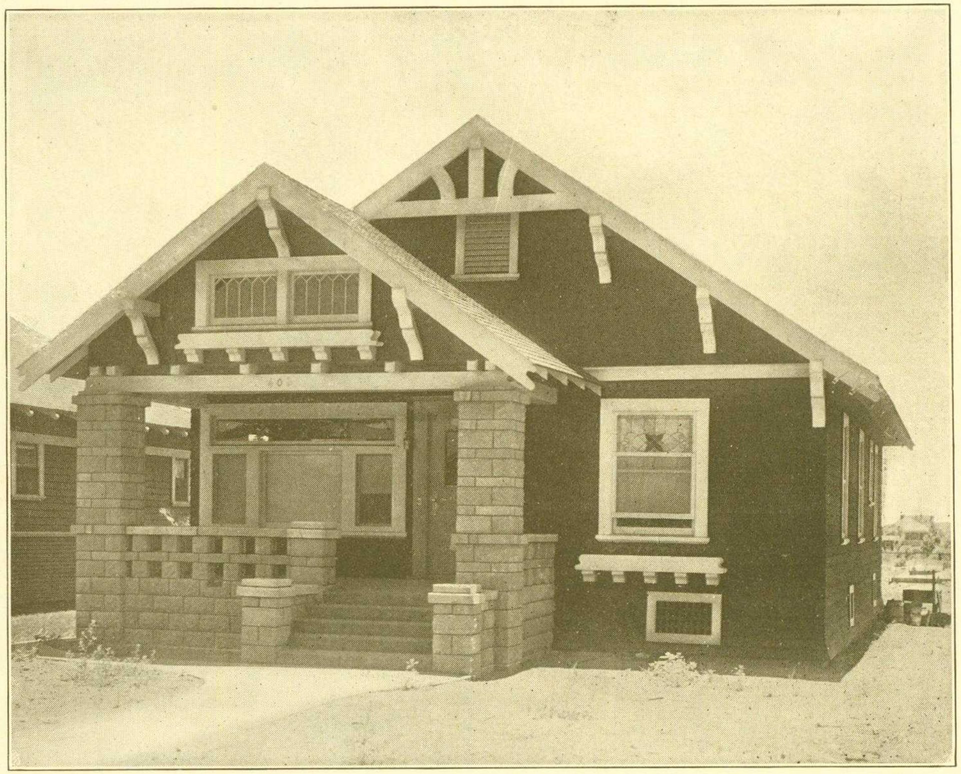
SECOND FLOOR PLAN

Built for a large family but a Bungalow on chalet lines. Both rear bedrooms may be made into open-air, screened sleeping rooms. Construction is of wood with brick porch-work, chimneys, etc. Servants' stairway is a taking feature.

Size about 42x36; cost with cellar about $4000.00.

Complete working plans and specifications with all interior and exterior details, either as shown or reversed, $10.00.

NUMBER 341



This is a house which can always be recommended as a great deal for a little money. It is 26x47 in size and can be built for about $1400.00. The porch work may be of brick instead of stone without detracting from its appearance. Two floor plans are given (see next page).

Complete working plans and specifications either as shown or reversed, $10.00.

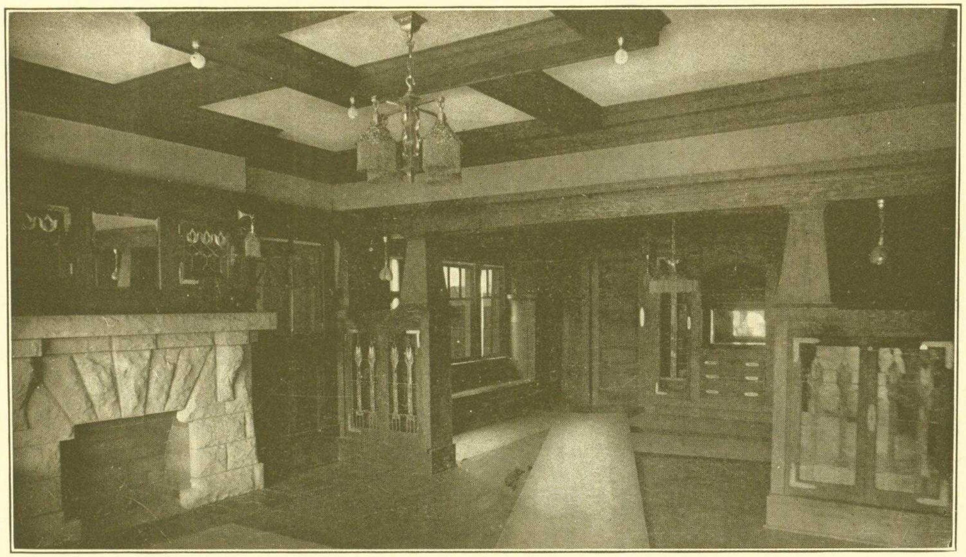
SECOND FLOOR PLAN

Planned especially for a wide but not deep lot. Every feature of the house is good and it has proved very satisfactory.

Size 36 ft. front by 22 ft. deep, not including porches. Cost including cellar about $2800.00. Note two rooms which may be open sleeping rooms.

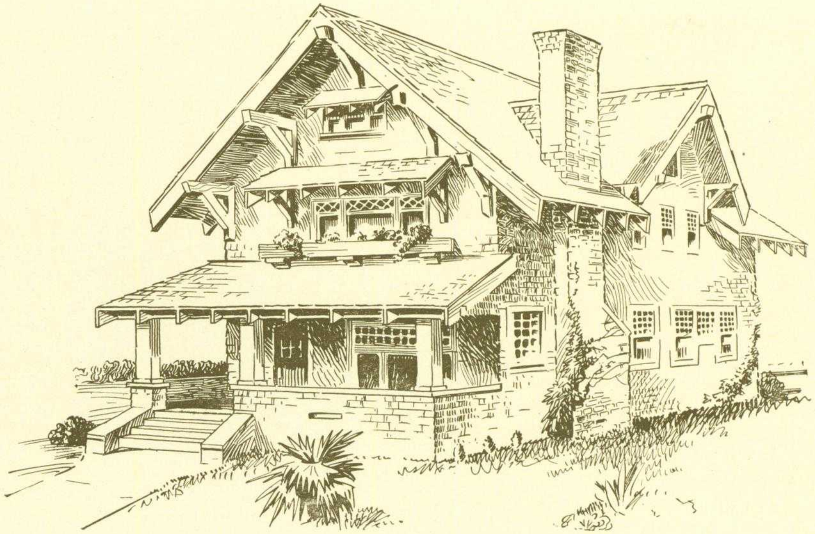
Complete working plans and specifications with all interior and exterior details, either as shown or reversed, $10.00.

A BUNGALOWCRAFT INTERIOR



This interior was photographed before the home was furnished. It shows a good inexpensive beamed ceiling effect with a drop-beam over the buttressed opening; book-cases in the buttresses; built-in buffet in dining room; cut stone mantel in living room, etc. The electric lighting fixtures are good and are arranged artistically. Our interiors all furnish beautifully and without much expense.

NUMBER 350



One of the most satisfactory little Bungalows we have ever made. As shown here (see floor plans next page) it has been built many times at from $2100.00 to $2400.00. It will go nicely on a narrow lot, and look still better on a wide lot with plenty of trees and shrubbery. The exterior is so popular that we give three varying floor plans on the next three pages.

Complete working plans and specifications either as shown or reversed, $10.00.

Floor Plan No. 361

A beautiful little Bungalow leaning to Japanese lines but not enough to make it appear "freakish." Size 30 ft. by 54 ft. and cost $1800.00 to $2000.00 according to inside finish, etc. The lavatories in each bedroom are attractive features, and the rooms are all of good size, light and airy.

We are perhaps "cranks" regarding the ventilation and sanitary conditions of our houses, but the value of good health in the family cannot be overestimated. Complete working plans and specifications either as shown here or reversed, $10.00.

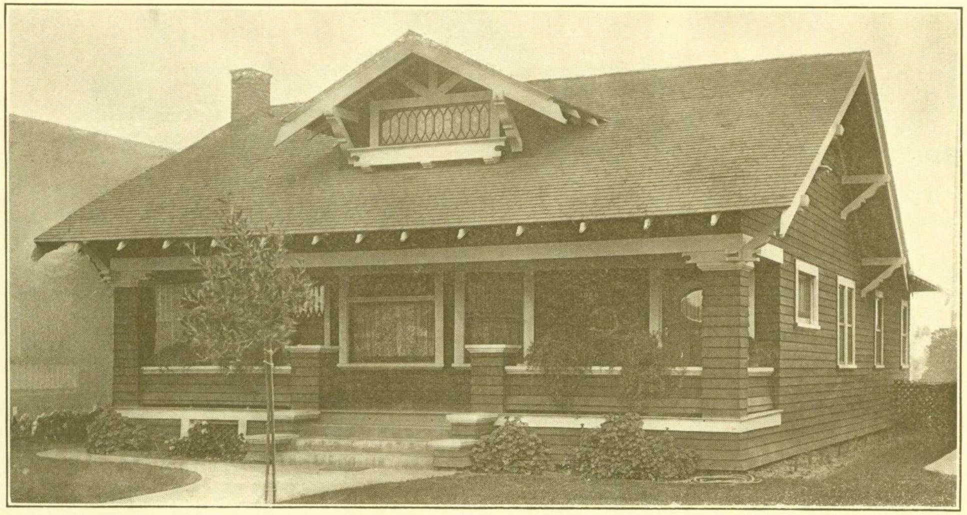
This little home was designed by one of our draughtsmen for himself and little family and was built at a cost well inside of $1000.00. The exterior is weatherboarded except the front gable which is shingled. Plumbing, electric lighting, plastering, etc., is all of the best quality and it is altogether a most satisfactory little home. One side of the buttressed opening contains a bookcase for the living room, and the other side has a china closet opening into the cozy dining room.

Complete plans and specifications either as here shown or reversed will be furnished for $8.00.

NUMBER 376



A design that is always popular and so elastic that it may be made in almost any size and with many different room arrangements.

We give three floor plans on this and the next page.

Complete working plans and specifications either as shown or reversed, $10.00.

The design of this book is primarily to show the popular five and six room Bungalows which we plan in such abundance, but it may not be out of place to show some larger ones in order that our friends who order special plans may see something of our facilities.

The above might almost be termed a Bungalow mansion (see floor plan on next page) and its title would be quite as well in keeping as the term "cottage" for some of the palatial residences in Newport, R. I.

Complete working plans and specifications either as shown or reversed, $10.00.

ELEVATION OF BUFFET WITH A HINT OF WAINSCOT, PLATE RAIL, AND BEAMS

This house was designed by a lady who had already built three homes for herself, and embodies her experience and the results of her study of convenience. The floor plan is exceptionally well arranged for convenience and comfort. The house is 40 ft. front so it requires a 50-ft. lot. It was built for $2450.00.

Complete working plans and specifications as shown here or reversed, $10.00.

During 1910 this house was built many times and its owners were well pleased each time.

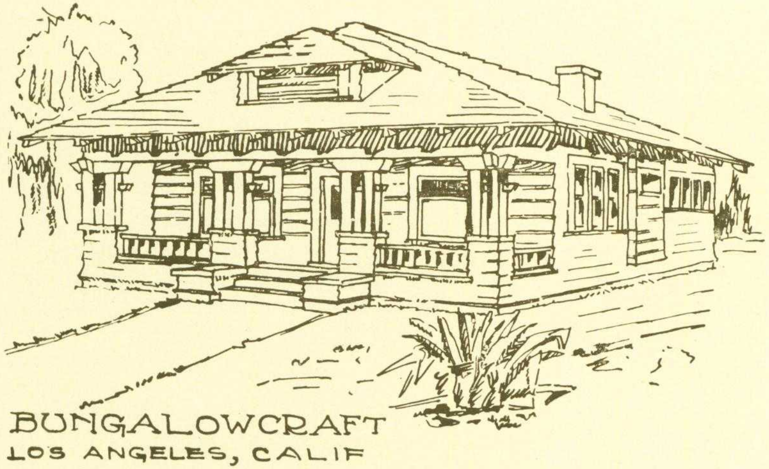
Second Floor Plan

The round porch columns of this house give a mild suggestion of the Colonial style, but it is built on pure Bungalow lines. Its features are the broad front porch, the small hall or vestibule, the den with the main stairway just back of the living room, the separate stairway from kitchen to landing, the butlers pantry between kitchen and dining room, etc. Upstairs are four good bedrooms, bath room, and six closets including a linen closet.

This house has proved a favorite with our friends back East, who do not take kindly to our California custom of entering the living room directly from the front door. The house is 32 ft. by 36 ft. and has been well built in California for $2400.00. Complete working plans and specifications either as shown or reversed, $10.00.

The exterior of this house is much like No. 62.

NUMBER 509



BUNGALOWCRAFT
LOS ANGELES, CALIF

Always popular and always satisfactory

A pretty home-like little house which can be built for from $1250.00 to $1400.00, according to inside trim, location, etc. The rooms are all of good size and their arrangement could not be improved. There are plenty of roomy closets, open fireplace and buffet, and a linen closet. The front is only 26 ft., so it is well adapted to a narrow lot. Complete working plans and specifications either as shown or reversed, $9.00.

NUMBER 518

This beautiful Bungalow is one of the "show houses" of Los Angeles. The outside woodwork is all rough (wire brushed) lumber stained. The front porch buttresses and walls, and the exposed chimney are of dark red brick with dark gray pointing. The Den opens from the Living Room through sliding doors so that in an emergency it may be used as a bedroom. It has a disappearing bed. The floor arrangement is fine and the rooms are all of good size. The house is 28 ft. by 46 ft. exclusive of porches, and cost somewhat less than $1900.00 built in first class manner throughout.

Complete working plans and specifications either as shown here or reversed, $10.00.

CAUTION

Don't Build Without Plans

It is a certain cause for disappointment to attempt to build our Bungalows from the pictures in the book, and without our plans. The intent of the book is only to give a general idea of the house and its arrangement. The complete plans are inexpensive and without a plan with its exact measurements and carefully studied details it is impossible to get the artistic beauty and cozy convenience for which our Bungalows are noted all over the world. In fact a good plan is the best and most economical investment a home builder can make. It eliminates all possibility of "extra charges," which is the great bugbear of building. The contractor knows exactly what he must furnish in labor, materials and workmanship, and the owner knows exactly what he may expect to receive and just what he must pay.

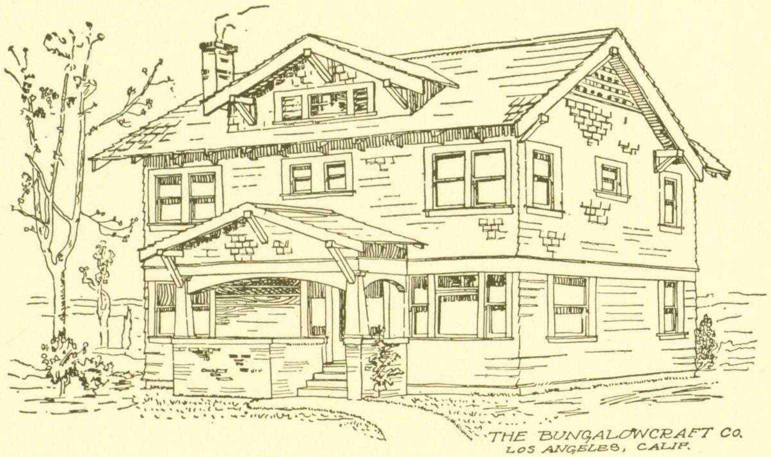
FIRST FLOOR PLAN SECOND FLOOR PLAN

This Bungalow was designed especially for a gentleman with a large family who had just a certain amount of money—$2500.00—to invest, and it was built at that cost and well built. The dimensions are 28 ft. by 36 ft. and there is not a foot of waste space and yet there is an air of roominess about it.

The ventilation and lighting are excellent, the rooms are of good size and well balanced, the kitchen is our regular full cabinet style with every convenience and there are plenty of good closets. Unfortunately the illustration gives a very poor idea of the exterior, which is really artistic and very attractive.

Complete working plans and specifications either as here shown or reversed, $10.00.

NUMBER 524



THE BUNGALOWCRAFT CO.
LOS ANGELES, CALIF.

One of the most popular of our 2-story Bungalows of moderate cost. A special feature is the arrangement of the front porch steps which permits a person to reach the front door without disturbing the occupants of the porch. Living and Dining Rooms both have cozy front nooks. The main building is about 36 ft. front by 24 ft. deep and is especially adapted to a lot that is not very deep. The cost is from $2000.00 to $2300.00, according to inside finish, locality, etc.

We do a very large business and it has all been built up by pleased clients who tell their friends.

PORCH
18'-6"X7'-6"

The exterior of this Bungalow is very much like our No. 518 on page 97 and the exterior construction is practically the same, but the interior arrangement is quite different. Both bedrooms connect directly with the bathroom, which is also reached quickly from Dining Room or Kitchen. The coat room with its lavatory between Den and bedroom is a very handy feature.

The house is 30 ft. by 50 ft. exclusive of the front porch and its cost was $2000.00.

Complete working plans and specifications either as shown here or reversed, $10.00.

Don't try to build without plans. It will cost you a good deal more and your house will not be satisfactory.

NUMBER 547

Of all the big rambling houses we have designed at low cost this is our favorite. It is an ideal home where comfort and convenience are considered rather than "style." Study the floor plan. Billiard room, attic den, or two bed rooms may be made on second floor. Size 42 ft. by 44 ft. Cost about $1800.00.

Complete working plans and specifications with all interior and exterior details, either as shown or reversed, $10.00.

Beaver Board

The new substitute for plaster, the ideal material for Bungalows, clean and sanitary, HEAT, COLD and SOUND proof.

It can be decorated, tinted, or painted—affords splendid opportunity for artistic decoration such as water colors. This would apply particularly to dining room, or any other room for that matter.

This material is having a wonderful sale throughout the East. Notice the advertisements in the leading magazines.

LINOFELT
Linen Felt made from Flax Fibre

Every Bungalow is too hot in summer and too cold in winter

"LINOFELT" has made it possible to correct these extremes.

Insulate the roof, walls and floors of your bungalow with a layer of "Linofelt," and it will exclude the extreme heat of summer and protect you from the cold winds of winter.

"LINOFELT" is made of de-gummed linen fiber.
It is equal to 38 sheets of building paper.
It is sanitary and vermin proof.
It does not deteriorate or decay.
It insulates againts heat, cold and sound.

"LINOFELT" adds less than 1% to tbe total cost of your bungalow.

"LINOFELT" is the one thing needed to make your bungalow home perfect.

"LINOFELT" has no equal for built-in refrigerators.

Our Patent Disappearing Sliding Screen

will add greatly to the comfort and convenience of your home. We furnish these windows and install them in your Bungalow. The following are some of the valuable features obtained by the use of our windows: 1. Perfect ventilation top and bottom, with absolute fly protection. 2. Screens disappear automatically when you close your window. 3. No screen is before the glass at any time, saving your eyesight. 4. Both screens are detachable in a moment. 5. Windows are easier cleaned. 6. Shade is attached to the upper screen and comes down with the sash when opened so as not to block the ventilation above. 7. Your shade is never flapping in the breeze. 8. Your house has a neater appearance inside and out. 9. Will sell quicker. 10. Is more convenient and sanitary. 11. Does not shut out the light. 12. Screens will last a lifetime. 13. Copper screens top and bottom. 14. First class workmanship. 15. We guarantee these screens for five years.

READY AT ALL HOURS—BY JUST TURNING A KEY. DOESN'T THAT SOUND GOOD TO YOU?

"PILOT"
The World's Standard

You Can Have It in Three Days It takes us just that long to install without inconvenience to you, a plant for making gas at home—including piping, handsome chandeliers, self-lighting burners and cooking appliances.

No Country Home Complete Without It Write us today and let us send you our free booklet telling all about this wonderful *home-made gas* and how comparatively small the cost of this great improvement to your home will be.

Acetylene Apparatus Mfg. Company
557 South Los Angeles Street *Los Angeles, California*

WITH A

Pilot Automatic Generator

you can make ACETYLENE—the wonder light—safer than city gas, brighter than electricity, cheaper than either.

Fifty-seven hospitals in New York City are using ACETYLENE. It is a soft, eye-saving light.

The *Feeding Device* of a carbide feed generator is the vital part. The PILOT does not depend upon the Gasometer for its power but has an independent motor feed, simple, sure and positive in its operation, assuring a uniform pressure and eliminating all possibility of clogging up or over-feeding, which is possible in other types of generators.

The Government has adopted and uses the PILOT in its army posts, parks, reservations and Indian schools.

Thousands of homes, churches and schools use the PILOT. It has been examined and approved by the *National Board of Fire Underwriters* and the manufacturer's guarantee goes with every machine.

The most beautifully lighted towns in all parts of the world use Acetylene.

Manufactured by

The Crown Building Material Co.

Main 2527 342 Douglas Bldg., Los Angeles

Superior Points of Crown Fibrous Plaster Boards

FIRST COST—ONLY COST

They are made of the best Rock Gypsum, which is much stronger and preferable to the ordinary gypsum.

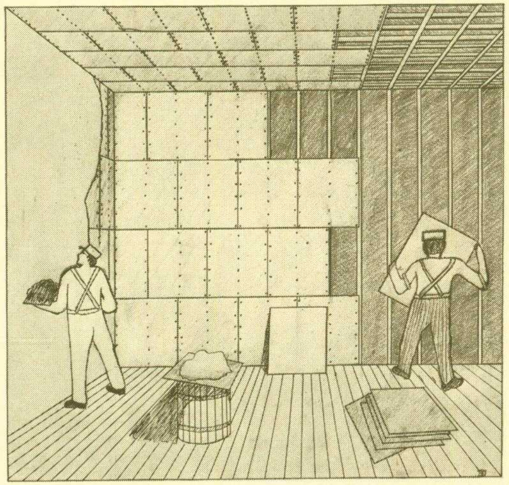
They have the greatest fireproof qualities.

They are not damaged by water, therefore leaks in plumbing and roofs will not cause plaster to fall.

There is no possibility of separation in the Board itself, as it is a solid fibrous mass, thereby doing away with falling plaster.

CROWN FIBROUS PLASTER BOARDS consist of Rock Gypsum and Fibre and are made in sheets 32x36 inches, of ¼ inch and ⅜ inch in thickness, either of which can be applied to furring and studding 8, 12 or 16 inch centers. We also make thicker boards to order.

CROWN FIBROUS PLASTER BOARDS, plastered with a good pulp plaster, are as cheap as one coat lime and hair mortar on wood laths. They are fireproof, warmer and 100% more durable.



CROWN FIBROUS PLASTER BOARDS are accepted where Underwriters and Municipal Departments require slow burning construction.

CROWN FIBROUS PLASTER BOARDS, plastered with a good cement mortar, are as cheap as first-class lime and hair mortar in three coat work on wood laths and 25% cheaper than metal laths, has superior fire-proof qualities to metal laths and the question of rust is eliminated.

Specifications

Apply Crown Fibrous (¼ inch thick) Plaster Boards to walls and ceilings so that the long joints between boards will run horizontally on the walls and crosswise to furring on the ceiling, leaving ¼ inch space between boards, as shown in the accompanying cut. Secure the boards with 1¼ inch No. 10 wire nails with flat heads ⅜ inch in diameter, using at least eighteen nails to each board. (See cut).

FOR OUTSIDE WORK: Apply in same way and finish to suit.

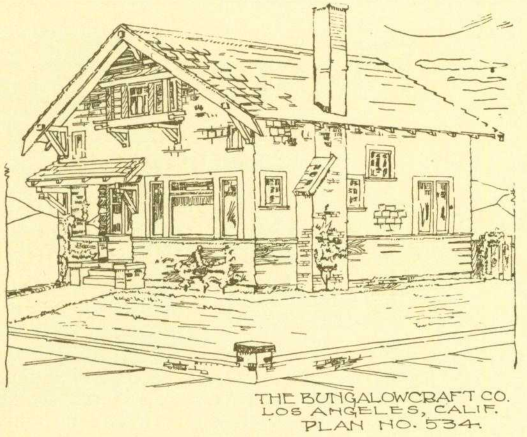
It should be remembered that for OUTSIDE, as well as inside walls these boards give the best possible construction where plaster or cement finishes are to be used.

FOR FIREPROOFING MILL CONSTRUCTION, nail boards directly on to surfaces to be protected, paper side out, and apply approved cold water paint.

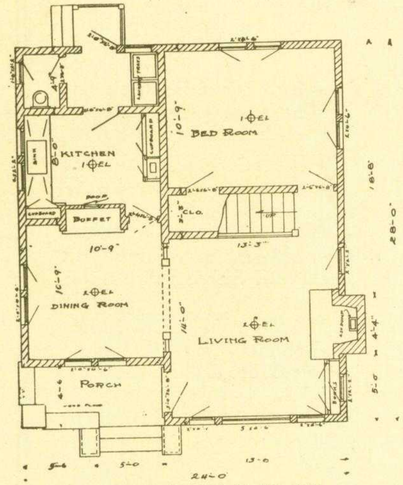
CROWN FIBROUS PLASTER BOARDS are superior as a fire protection and deafening between rough and finished floors.

TO CUT BOARDS, use a carpenter's saw or score with a knife or hatchet.

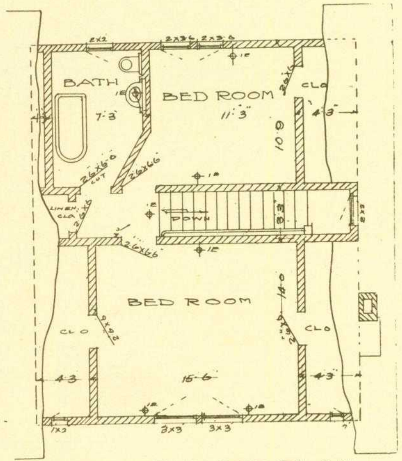
NUMBER 534



THE BUNGALOWCRAFT CO.
LOS ANGELES, CALIF.
PLAN NO. 534.



FIRST FLOOR PLAN
SCALE 1/4"=1'0"



SECOND FLOOR PLAN
SCALE 1/4"=1'0"

A clever little 1½-story house house with six rooms which has been built for $1600.00 with a small cellar. It is an excellent house for a small lot, being only 24 ft. by 28 ft. Complete plans and specifications, either as shown or reversed, $10.00.

TESTIMONIALS

Our Business is Probably the Largest of Its Kind, and It Has All Been Built Up by Pleased Clients Who Have "Told Others."

"I want to congratulate you on your excellent and artistic designs, and in the name of all puzzled contractors and builders, to thank you for the perfect working plans, full details and complete specifications you are turning out."
J. F. Kavanaugh, Pasadena, Cal.

"I have just built a home in accordance with your plans and specifications. They were very satisfactory to me in every particular."
F. C. Hanna, Colton, Cal.

"We are delighted with our house. We have found nothing that compares with your plans."
Dr. D. C. Davenny, Ritzville, Wash.

"The plans were received in good shape and I like them very much."
C. E. Maddocks,
Colorado Springs, Colo.

"Contractors say that your plans are as fine as any hundred dollar plans they ever saw."
E. A. Hathaway,
Central Point, Ore.

"We find the plans to be among the most desirable we have seen."
Thurman Door Co.,
Madera, Calif.

"I like the style of your plans the best I have seen."
G. E. Scudder,
Binghamton, New York.

"The sketches of elevations, and the floor plan came in this morning's mail. I am more than pleased with both. I like them both immensely."
C. F. Ray, Pueblo, Colo.

"Have received parcel O. K. Am more than pleased with the plans."
A. J. Shumaker,
Jefferson, Oregon.

"The house I am building now from one of your plans is very satisfactory and I am well pleased with the plan."
G. E. Noll, Phoenix, Arizona.

"Plans and specifications received and are highly satisfactory."
Wm. M. Oliver, Dillon, Mont.

"I am very pleased with the plans and I think I shall have a fine little home."
Emil Peterson, Portland, Ore.

"This is a mighty pretty plan. I had my check all made out to send to another architect of your city for one of his plans when your book fell into my hands. I like your plans better."
Ford White, Buffalo, N. Y.

"I found the plans very satisfactory and will refer people to you."
Will St. John, Detroit, Mich.

"I received the two sets of plans both of which seem to be very satisfactory."
E. C. Hardy, Ludington, Mich.

"Like plans fine and think I shall have the prettiest little home in our city."
Geo. W. Patton, Cape Girardeau, Mo.

"Am much pleased with the plan received."
Clyde S. Niles, Medford, Ore.

"I am in receipt of the plans and am very much pleased. They are 'just what the doctor ordered.'"
W. S. Sigler, Mexico, D. F.

"I am a contractor and builder here and have just finished a bungalow from your plan No. 518. I like your plans very much
C. H. Wheeler, Los Gatos, Cal.

"The details of the plans are beyond criticism."
Harold Ryland, Norwood, Ohio.

"Plans and specifications received and the builders have gone over them; I was delighted to note their praise of the plans which in every way are very complete and the builders accepted them without correction or alterations."
Wallis McCarthy, San Francisco, Ca
